

# Green Power

## SOLAR POWER PURCHASE AGREEMENTS

### Key Benefits for Commercial Property Owners and Tenants

A solar power purchase agreement (PPA) is a financial arrangement in which EVA Green Power owns and operates a solar energy system at a customer's property. The customer has access to a reliable and affordable source of renewable energy, with key benefits including:

#### NO UPFRONT CAPITAL COSTS

EVA Green Power assumes all costs of designing, permitting, and installing a solar energy system at the customer's location. The customer is able to convert to solar the moment the system is operational, benefitting from savings immediately.

#### REDUCED ENERGY COSTS

EVA Green Power sells the electricity produced by the solar array to the customer at a predetermined rate, substantially lower than that provided by the local utility company.

#### LIMITED RISK

EVA Green Power is responsible for all system performance and maintenance of the solar array throughout the term of the PPA leaving the customer free to run their core business.

#### STABILITY

PPAs typically range from 10 to 20 years and provides long-term price stability to the customer.

## POWER PURCHASE AGREEMENTS

PPA Agreement between you and EVA Green Power

EVA Green Power assumes all design and installation costs

You enjoy the benefit of renewable energy at substantially lower rates

EVA Green Power monitors and maintains the solar array

**Lower electricity rates for 10-20 years**

# The Process

## Step 1

### Consultation

We visit your site to determine site suitability and optimal solution for your business.

## Step 2

### Proposal

Based on information obtained for the site visit and your energy consumption profile, we provide a proposal which best suits your business.

## Step 3

### Agreement

An agreement is provided which outlines system design and specifications, timeframes, fixed energy price, early buy-out rates, terms and conditions.

## Step 4

### Installation

The system is constructed and installed in accordance with the agreement and all regulatory requirements.

## Step 5

### Connected & Saving

Finally, you simply pay for what you use. We take care of all system monitoring and maintenance.
